

Informing School Improvement

How do we achieve positive and practical change in our schools? We listen to what students, teachers and parents have to say.

Providing valuable insight for your school planning

The OurSCHOOL Survey is a complete evaluation system for measuring student engagement, well-being, classroom climate and other factors known to affect learning outcomes. Information is captured from students, parents and teachers to inform school policy and practice.

Used by over 6300 schools and 5.4 million students worldwide

Helping to identify your school improvement initiatives

Our intuitive interactive charts help you to discover areas for targeted intervention and identify at-risk groups. These can be used alongside our thematic reports for straightforward interpretation of the data.

The most widely used school survey in Canada and Australia

Drawing on leading indicator research

The OurSCHOOL survey measures were developed by Dr. J. Douglas Willms, in consultation with international subject-matter experts. His knowledge is embedded in the intellectual property of the survey and reinforces the importance of using leading indicators, as opposed to trailing indicators, to provide the best foundation for school improvement.

Powerful features

to help you measure results, target interventions, and monitor progress.

Customize the survey based on your priorities

Tailor your reporting to precisely what you need; select from 80+ measures (secondary) related to school completion, student engagement, bullying and school safety, career aspirations, emotional and physical well-being, risky behaviors and more.

Use OurSCHOOL norms as a benchmark for growth

Compare your results with OurSCHOOL norms, and see a virtual “Replica School” with demographics matching your students.

Benefit from advanced reporting functionality

View your reports within two days of the survey’s completion, enabling you to analyze results immediately. Use our drill-down functionality to extract and share your information in presentation or report formats. Anonymity of survey-takers is ensured.
